

Car Wash Systems Inc

RLS Construction Group was chosen to construct several new car wash facilities, at various sites throughout South Central Pennsylvania. The project work will include land development plans, grading, cut/fill, stormwater, curbs, sidewalks, paving and line striping. Additionally, the facilities will consist of two (2) pre-manufactured automatic bays at each location, erected on the site, and associated equipment rooms with 8" block walls, featuring core insulation, a metal joist roof and an insulated membrane roof over metal roof decking.
