

Security System Renovations

RLS Construction Group was contracted by the United States General Services Administration to perform renovations and upgrades to the security systems at the US Immigration and Customs Enforcement facility located in Lords Valley, PA. The project includes renovating the perimeter and secure areas to upgrade the walls, doors, ductwork openings and exterior windows; improvements to the LAN Room and security room; providing additional ballistic protection for the reception area and weapons storage room; and installing a new, turn-key, Security Management System (SMS), which will include intrusion detection, physical access control, visitor management and closed-circuit television. The project will provide advanced technologies, allowing the staff to work safely and efficiently.

Location:
Lords Valley, PA

Client:
US General Services Administration

Cost:
\$279,800

Completion Date:
