

Grantham WWTP Operations Building and Garage

RLS Construction Group was contracted to provide general construction services associated with improvements at the Grantham Waste Water Treatment Plant in Upper Allen Township. The project involves construction of a new Operations Building and Garage. The specific tasks include erosion and sedimentation controls, civil and site work, installation of cable internet, demolition of existing garage, yard piping and sanitary water line, electrical systems installation/integration with existing facility systems, and mechanical and plumbing construction. A primary focus of this work is to coordinate the construction with several, on-going projects at the site, to minimize disruptions to all schedules and allow for expedient completion.

Location:

Mechanicsburg, PA

Client:

Upper Allen Township

Cost:

\$899,996

Completion Date:

on-going
