

# Lebanon VA Medical Center Isolation Rooms

**RLS Construction Group** was selected by the Department of Veterans Affairs to upgrade air handling and ventilation systems for the isolation rooms at the Lebanon VA Medical Center campus. The project involved replacement of the HVAC equipment and balancing of the system to promote negative pressure within the rooms. The system enables a full life-support environment, as well as contamination control for the area. The specific work included finish replacements, minor demolition, wall construction, and mechanical, electrical and HVAC system improvements. **RLS** performed the tasks associated with this project with minimal disruption to the patient care and daily operations of this large and busy medical center.

Location:  
**Lebanon, PA**

Client:  
**Department of  
Veterans Affairs**

Cost:  
**\$275,900**

Completion Date:  
**January 2012**

**RLS**
