

Naval Support Activity Loading Docks

RLS Construction Group was selected by the Department of the Navy to provide the necessary work for upgrades and improvements to the loading dock areas for three separate buildings at the Mechanicsburg, PA Naval Support Activity location. The work included removal and replacement of the existing concrete loading dock slab and retaining wall at Building #04, as well as replacement of the existing pavements, and ensuring a smooth transition between the new concrete dock slab and the existing concrete floor. At Building #101, **RLS** removed the existing concrete dock, including the ramps and retaining wall, and installed new concrete steps at four (4) personnel door locations. Finally, two (2) new precast concrete loading docks, with ramps, were installed at Building #604, which involved providing concrete foundations and pads to secure the new loading docks and ramps so any movement of the new structures is prevented. The finished project provides this busy government facility with increased functionality and efficiency.

Location:

Mechanicsburg, PA

Client:

NAVFAC Mid Atlantic

Cost:

\$876,764

Completion Date:

October 2012
