

Philadelphia VA Medical Center Correct Electrical Deficiencies

RLS Construction Group was selected by Department of Veterans Affairs to provide general construction services related to the correction of electrical deficiencies at the Philadelphia VA Medical Center, in Philadelphia, PA. The work will be performed in Buildings #1, #2, #21, and #30 to bring the electrical systems up-to-date and to ensure that they are operating with maximum efficiency. In order to minimize disruptions to the staff, visitors and patients, the work will be performed during “off” hours, after 5:00 pm and before 7:00 am, and will be coordinated with the medical center staff.
