

Temple Ohev Sholom

RLS Construction Group was selected by the congregants at the Temple Ohev Sholom to renovate the entire vestry and adjoining restrooms on the lower level of the Temple's sanctuary building. The project restored the water-damaged lower level, including demolition and disposal of existing finishes, wood furring, counters, plumbing fixtures, and light fixtures, as well as removal of the existing concrete floor. Additional work involved installation of under slab drainage media and sump pump system, pouring new concrete slab, installation of new flooring, and painting. **RLS** was successful in meeting the customer's deadline to have the project completed prior to the Jewish high holiday season in September.

Location:
Harrisburg, PA

Client:
Temple Ohev Sholom

Square Footage:
5,910

Cost:
\$232,516

Completion Date:
September 2012
