

Northern Appalachian Research Laboratory

RLS Construction Group was selected by the U S Geological Survey to remove a previously installed roofing system and install a new 45,000-sf Duro-Last PVC membrane roofing system. This project, at the USGS Northern Appalachian Research Laboratory, involved all labor, materials and associated work for the successful replacement, including appropriate insulation and connections for roof-top mounted equipment, as well as replacement of windows that were adjacent to the roof area.

Location:
Wellsboro, PA

Client:
U S Geological Survey

Square Footage:
45,000

Cost:
\$444,872

Completion Date:
December 2011
