

US Marshall Service

RLS Construction Group was contracted by the US General Services Administration to provide alterations to the 5th floor of the Reagan Federal Building in Harrisburg. The project provided spaces specifically designed for the US Marshall Service staff housed at this location. The updated spaces include a computer room, squad room, private office spaces, utility/file room, supply room, lunch room/kitchen, locker room, reception area, administrative spaces and conference room. The newly renovated spaces provide functional work areas, which allow the staff to complete their tasks with maximum efficiency.

Location:
Harrisburg, PA

Client:
US General Services Administration

Cost:
\$169,000

Completion Date:
October 2013
