

# VA Maryland Health Care System Baltimore VA Medical Center

**RLS Construction Group** was selected by the VA Maryland Health Care System to perform upgrades and renovations at the Baltimore VA Medical Center. The work includes various treatment and patient areas throughout the facility, in order to provide a comforting and healing environment at this busy, downtown facility. The work includes updating the ICU Nourishment Rooms with new cabinets, counter-tops, paint, and flooring. Additionally, the Radiology Office and Dental Clinic Utility Room were renovated to make the spaces more efficient and provide better space utilization. The Oncology Exam rooms and main lobby were updated with new paint to give a fresh look to these spaces, and the lobby also received new wallpaper and acoustic wall panels. The corridors and public areas on the 2nd, 5th, 6th and 7th floors were updated with repairs and fresh paint. The Parking Garage vestibules were repainted, as well. All of the work will revitalize this building to make it much more inviting and give the patients, staff and visitors a more hospitable environment.

Location:  
**Baltimore, MD**

Client:  
**Department of  
Veterans Affairs**

Cost:  
**\$199,000**

Completion Date:
