

Wilkes Barre VA Medical Center Room EB-43 Renovations

RLS Construction Group was selected by the Wilkes Barre VA Medical Center to renovate Room EB-43 in the basement of Building #1 on the medical center campus. The work consisted of removal of flooring and repair of underlying concrete, as well as installation of new epoxy floor that will feature a smooth, anti-slip material applied to the surface. The existing plumbing systems were removed from the wall and replaced with new equipment, including a new water faucet and hose faucet. New electrical power was installed to accommodate upgraded equipment, that includes new T-8 lighting for the ceiling. Furthermore the existing walls, doors/frames, and ceiling were patched and painted, and 8-ft stainless steel panels were installed around the perimeter of the room.

Location:
Wilkes Barre, PA

Client:
**Department of
Veterans Affairs**

Cost:
\$35,648

Completion Date:
November 2012
